DISCUSSION: WHAT IS ATTRACTION?

- We discussed our own perspectives and experiences concerning attraction:
 - “When the north pole and south pole love each other very much.”
 - “The final boss. The final destination.”
- The main discussion was about the distinction between sexual attraction and other types of attractions such as:
 - Platonic attraction – perhaps people you could tolerate. Squishes.
 - Sensual attraction – want to cuddle.
 - Aesthetic attraction – appreciating the visual.
- Alloromantic normativity
 - That the idea of dating is normalised in society.
 - “I don’t like dates.” “So you like prunes.”
 - When people haven’t encountered that some people do not want to date, there is the assumption that they’re just wrong.
